

Specifications

Compact during transportation, the **Expandable 25ft Container** comprises a flat surface area of 33m² once extended. The chassis is equipped with four twistlocks, allowing the container to be transported easily and safely by normal truck. Upon arrival, the 25ft Container lowers itself to the ground by means of four wirelessly controlled hydraulic cylinders. The cylinders are placed flat on the ground, out of sight once the longitudinal sides have been extended. You can fully customize the container, both inside and out, to meet your requirements. Making it a container

that is easily deployable at any given location, whether it be an exhibition or roadshow. For example, equip the container with a glass wall and sliding doors to transform it into an attractive and representative exhibition room. With a step height of only 26 cm.
